THE PREY SEQUENCE AND HOW YOUR DOG PLAYS...

Every dog has a different “play style”. This will be influenced by their breed and natural instincts. The prey sequence and your dogs play style are closely linked.

Understanding what parts of the sequence your dog likes will not only increase your bond, it will help wear them out, provide biological fulfilment and can improve your training ten fold !

SEEK

Look and sniff...until you find it ! Dogs have up to 300 million scent receptors...so make the most of them by playing scent games !

STALK

Watch and follow...sneaky and slow....get down low before you make a move ! Personal play and flirt poles are great fun !

CHASE

Its on ! Youre running after it, as fast as you can ! Think fetch and toys that you can drag along the ground.

CATCH

You've successfully chased it down, so now you pounce on it, its yours ! Grab it and be proud !

KILL

Shake it a lil, hold on tight ! Your dog may shake a toy from side to side, or mouth it and pull at it. A good ol structured game of tug should suffice !

CONSUME

Yup - nom nom, rip it apart. When your back yard looks like its been snowing but its just the stuffing from a toy !!

CELEBRATE

Let em know ! You did it...ba baaaam ! Prance around with it.
You own this show !

All play should be structured with rules to keep everyone safe !
