

THOSE FIRST FEW WALKS WITH YOUR PUPPY !

So your pup is now fully vaccinated and your vet has given you the all clear to start going on walks in the big bad world !!

Here's a few helpful tips to make your first few walks easy and stress free for you and your pooch !

- 1 Go slow, let your puppy take in their surroundings and habituate to their environment.
- 2 Keep your criteria low...you don't need to start loose lead walking training outside just yet.
- 3 Use a long lead (3 or 5 metre) to help prevent pulling and allow your puppy to explore safely.
- 4 Reward your puppy every time they 'check in' with you. Use a healthy treat or lots of pats and praise.
- 5 Keep your walks short - 10 mins or so and start in a quiet area first.
